EDUCATION

Boston University, Faculty of Computing & Data Sciences

Boston, MA

Bachelor of Science in Data Science

May 2025

Organizations: BU Spark!, BU Data Science Association, BU Sports Analytics Club, Stock Trading at BU

EXPERIENCE

Kubrick Group

New York, NY

Data & AI Consultant

Jan 2026 – Present

- Partnered with business teams to identify reporting needs, cleaning and transforming raw datasets using SQL and Python to deliver accurate, analysis-ready data on tight timelines
- Delivered analytics-ready datasets from a governed cloud data platform (Databricks, Unity Catalog), ensuring data reliability for business-critical reporting
- Designed and delivered Power BI dashboards tailored to stakeholder needs, translating complex data into clear insights that supported faster, more confident decision-making

Voya Financial

Boston, MA

Data Science Intern

Jun 2024 - Aug 2024

- Replaced quarterly Excel updates with a live SQL-powered Power BI dashboard, increasing reporting efficiency by 30% and enabling real-time market data monitoring
- Delivered vendor market data analysis through interactive dashboards adopted by 10+ departments, supporting contract negotiations and company-wide cost optimization
- Presented actionable insights to senior leadership, influencing cost-saving initiatives and improving data management practices

PROJECTS

Munch Market Analysis | *Databricks, Power BI*

Mar – Apr 2026

- Built Azure Databricks medallion pipelines to ingest historical and incremental data from SQL Server and Azure Blob Storage, including order files updated every 20 minutes, for daily 8 AM refreshes
- Profiled and cleaned 50+ restaurant data attributes, identifying issues across operating hours, categories, contact details, addresses, ratings, and availability to improve Silver-layer data quality
- Collaborated with Analytics, Delivery, and Restaurant stakeholders to translate business requirements into KPIs and analytical datasets supporting orders, sales, delivery performance, rider operations, and forecasting

Boston Inspectional Services Department – Data Reconciliation | *Python*

Jan – May 2025

- Cleaned and reconciled 100k+ city housing records using address standardization and fuzzy matching, enabling accurate detection of unregistered rental properties
- Identified 83k+ unregistered rental properties, surfacing compliance risks by geography, ownership type, and proximity to universities for targeted enforcement
- Delivered interactive dashboards and presented results to ISD officials, driving proactive enforcement strategies and improving housing compliance estimate fair prices for comparable properties

COVID-19 Policy Analysis | *Microsoft Azure, Power BI*

Sep – Dec 2023

- Engineered an Azure-based ETL pipeline integrating 10k+ COVID-19 records from multiple sources, centralizing data for improved accessibility and analysis
- Designed a star schema warehouse in Azure Synapse, streamlining data organization and enabling high-performance queries for large-scale analytics
- Built Power BI dashboards tracking infection and recovery trends, highlighting the three most effective policies in reducing case growth and informing public health decisions

CERTIFICATIONS

Databricks Certified Data Engineer Associate, *Databricks*

July 2026

Client Service Job Simulation, *Bloomberg*

July 2026

Google Data Analytics Professional Certificate, *Google*

August 2023

SKILLS

Programming: SQL, Python (pandas, numpy, scikit-learn, pytorch, tensorflow, matplotlib, seaborn)

Data & BI Platforms: Power BI, Tableau, MySQL, SQLite, PostgreSQL, MongoDB, Databricks

Cloud & Tools: AWS, Microsoft Azure, Google Cloud Platform, Git, Azure DevOps, Excel, MS Office
